INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

RECEIVED	
12 DEC 2003	
WIPO	PCT

Applicant's or agent's file reference MSP617	<b>FOR FURTHER ACTION</b> See Notification of Transmittal of International Preliminary Examination Report (Form PCT/PEA416)	
International application No. PCT/EP03/04346	International filing date (day/month/year) 08.04.2003	Priority date (day/month/year) 10.04.2002
International Patent Classification (IPC) or both national classification and IPC H05H1/24		
Applicant DOW CORNING IRELAND LIMITED et al.		

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.
2. This REPORT consists of a total of 5 sheets, including this cover sheet.  
  
☐ This report is also accompanied by ANNEXES, i.e. sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).  
  
 These annexes consist of a total of sheets.

EPO - DG 1

3. This report contains indications relating to the following items:
 

31. 12. 2003

I	<input checked="" type="checkbox"/>	Basis of the opinion
II	<input type="checkbox"/>	Priority
III	<input type="checkbox"/>	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
IV	<input type="checkbox"/>	Lack of unity of invention
V	<input checked="" type="checkbox"/>	Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
VI	<input type="checkbox"/>	Certain documents cited
VII	<input type="checkbox"/>	Certain defects in the International application
VIII	<input type="checkbox"/>	Certain observations on the international application

Date of submission of the demand  08.09.2003	Date of completion of this report  09.12.2003

**INTERNATIONAL PRELIMINARY  
EXAMINATION REPORT**

International application No. PCT/EP03/04346

**I. Basis of the report**

1. With regard to the elements of the international application (*Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)*):

**Description, Pages**

1-20 as originally filed

**Claims, Numbers**

1-19 as originally filed

**Drawings, Sheets**

1-3 as originally filed

2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- ☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).  
☐ the language of publication of the international application (under Rule 48.3(b)).  
☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.  
☐ filed together with the international application in computer readable form.  
☐ furnished subsequently to this Authority in written form.  
☐ furnished subsequently to this Authority in computer readable form.  
☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.  
☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages:  
☐ the claims, Nos.:  
☐ the drawings, sheets:

**INTERNATIONAL PRELIMINARY  
EXAMINATION REPORT**

International application No. **PCT/EP03/04346**

---

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)).

*(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)*

6. Additional observations, if necessary:

**V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

**1. Statement**

Novelty (N)	Yes: Claims	1-19
	No: Claims	
Inventive step (IS)	Yes: Claims	1-19
	No: Claims	
Industrial applicability (IA)	Yes: Claims	1-19
	No: Claims	

**2. Citations and explanations**

**see separate sheet**

International application No. PCT/EP03/04346

**Re Item V**

**Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

**References**

Reference is made to the following documents:

D1: US-B1-6 241 858.

D2: US-A- 5399 832, cited in the application (see § 13).

**Object**

The object of the present invention is to increase the coating rate of powder substrates of known atmospheric plasma coating techniques (see D2).

**Prior art**

D1 discloses a method for coating a powder substrate by providing a vaporized coating material into a chemical vapour deposition chamber. The powder is contained into a vibrating bed.

D2, which is cited in the application on § 13, discloses a method for powder coating by introducing the powder into an atmospheric plasma apparatus where selected gases decompose so as to deposit onto the introduced powder.

WO 02/35576, published after the priority of the present application, basically discloses the plasma assembly shown in Fig. 2 (see also claims 10-13) of the present application. It is cited in the application on § 37.

WO 02 28548, published after the priority of the present application and cited in the application (see § 17 and § 27) discloses a method for coating powder substrates via atmospheric plasma treatment with atomised coating material injection (see e.g. abstract and p. 8, l. 4). This document may be conflictive in the European Regional phase in view of Art. 54(3) EPC.

**INTERNATIONAL PRELIMINARY  
EXAMINATION REPORT - SEPARATE SHEET**

---

International application No. PCT/EP03/04346

**Independent claims**

Claim 1.

**Solution and assessment**

According to claim 1, an atmospheric plasma coating method for powder substrates is disclosed, in which the coating material is introduced in the plasma assembly in form of an atomised liquid or solid.

The here claimed invention is new and inventive over the searched prior art in the sense of Art. 33 PCT, because the following combination of features is not obvious from the available prior art:

- a) introducing the powder substrate into an atmospheric plasma reactor.
- b) introducing the coating material in the reaction chamber in form of atomised liquid or solid form so as to deposit it onto the powder.

Although in D2, which can be considered closest prior art, coating of powder substrates within an atmospheric plasma reactor is disclosed (feature a), no hint on why to use an atomizer to inject the coating material (feature b) is given. Furthermore, making such a choice is not obvious for the skilled person.

**Remarks**

1.) In order that the embodiment of Fig. 1 (see also claim 2) falls clearly within the scope of apparatus **claim 9**, the examiner suggests to introduce reference number 4 when referring to the means of introducing the powder into the chamber, reference number 1 for the chamber and number 3 for the atomizer.
